# Experience what matters with a new approach to digital engagement.

Your organization is dealing with too many data silos and disconnected apps, creating blind spots for leaders and inefficiencies for staff. On the other side of the coin, your constituents, customers, and partners are frustrated with fragmented and uncoordinated digital experiences. You need a cohesive, intuitive, role-based experience that unifies critical information and applications for all your users. ILINX Engage is the answer.

No More Blind Spots

ILINX Engage surfaces powerful, AI-automated enterprise workflows and real-time information in a single intuitive interface. Using a variety of integration APIs including REST, ILINX Engage taps into both legacy and modern systems to present unified information and services in user-centric digital experiences.

Get Right to It

No-code design tools enable you to easily aggregate relevant applications and workflows in each ILINX Engage experience, reducing distractions to help customers and internal users achieve more in each session. Loosely-coupled integrations synthesize information and systems, making data both readily available and actionable.

Never Waste a Window

Streamline stakeholder access to an array of systems and data sources in one layout. ILINX Engage intelligently tailors interfaces to unique user roles, including customers, constituents, executives, employees, and more. Contextual views present applicable information and services to help users accomplish specific process goals.

Technical Highlights

1. Easily integrate information of all types using simple REST APIs, Webhooks, and more
2. Orchestrate interaction between apps with built-in, no-code process automation designer
3. Support widgets including eforms, notifications, calendar, charts, external and custom Web pages
4. Deploy multiple applications with multitenant support
5. Organize information into multiple role-based views using a no-code designer

Vendor Payment and Coordination

Interact with vendors and align accounting with stakeholder acceptance by integrating payment processing to contract terms and conditions.

Licensing and Permitting

Enable applications, data collection, and self-service tracking of licensing and permitting processes.

Requisitions and Approvals

Enable self-service for submission, tracking, and the approval process.

Process innovation made easy.

ImageSource makes process innovation easy through advanced solutions built on ILINX, the world's most flexible process-improvement platform, delivered by a team of experts committed to customer-partner success.
